

TRANSNATIONAL MEETING

Following the COMP+ training activity for VET staff in Copenhagen, the partners used the opportunity to discuss the fresh insights and positive feedback in a Partner Meeting at the Virsabi headquarters.

On this basis, they decided on the next steps for the finalization of the course materials, the learning platform, and the VR scenarios.

The meeting in Copenhagen signified the start of the final project phase: The piloting of the four workshops, the next and final meeting in Cyprus (March 2023), and the Multiplier Events in the partner countries.

LTTA

The Short-Term-Joint Staff Training event took place in Copenhagen, Denmark in October 2022.

The training event focused on the use of Virtual Reality and the E-Learning platform of Competence+.

Trainers learned about the materials inside of the e-learning materials available here: www.competencepluselearning.eu

Furthermore, every participant got to try the VR experience and learn about how to use the Oculus Quest 2 in their class. Furthermore, they have learned how to facilitate the first class with their students, learning about safety precautions and pedagogical approaches to the inclusion of VR.

The partners of COMPETENCE + meet regularly online to monitor the progress of the project and plan future work.
